OPPORTUNITY "Cortijo Refurbishment project"

Are you looking for a complete refurbishment project to create a stunning home or investment property? This property has amazing sea and mountain views, is walking distance to Mijas Pueblo and has a sizeable plot that in the future could potentially be sub-divided or built on? Located on the outskirts of Mijas Pueblo, this Cortijo is unfinished and has SO much potential.

It has character woodwork features and stain glass windows that could be repurposed, currently there is space for 3 bedrooms with room for a 4th.

There are high ceilings, a foyer, a mezzanine, and an open space that could be a dramatic living area with windows that capture the beauty of the scenery.

There is a separate garage/store/barn that is large enough to turn into a self contained apartment. It is full of antique pieces from the owner who used to trade in them, so you might even find a few bits!

The plot is over 12,000 sqm down a private entrance and includes the villa, the barn, a large meadow with views to the sea and mountains and has a lower vegetable garden with trees.

A portion of the property is being lived in however the rest remains unfinished.

Contact us if interested in a viewing or more details.
